

## Pv-Ops Traceability System :

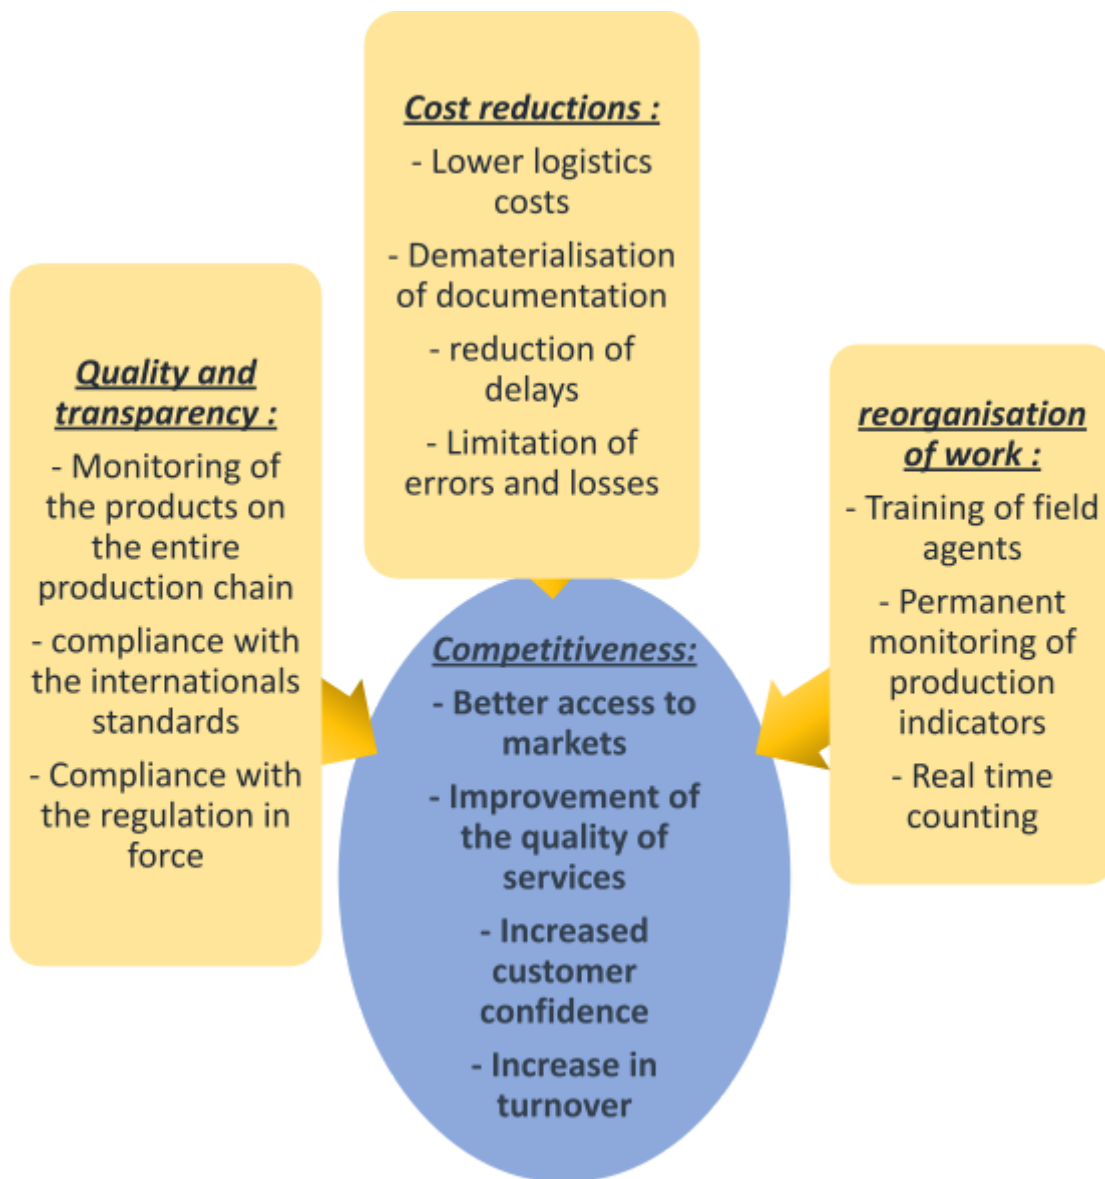

The traceability of products, from their origin to delivery at the final recipients, guarantees total transparency thanks to the collection of information at each key stage of production.

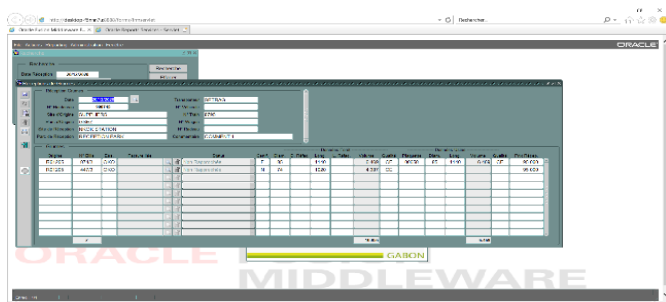

- Automation of *Logistics Flows* and *Order Preparation*.
- Improvement of *Productivity* and *Traceability* at the level of stock inventories, by carrying out real-time counts.
- Increased *Flexibility* and *Quality* of Information.

## Pv-Ops Traceability System :

- Improvement of all [Process](#) and [Services](#) offered to customers.
- Reduction of [Costs](#) and [Losses](#)
- Limitation of [Errors](#) to help increase turnover.

(TTO 2018, données 2017)

## Pv-Ops Traceability System :

### Strengths :

- Investment reduced by a monthly subscription
- Improved production management and logistics
- Better access to markets
- Increased consumer confidence
- Quick identification of products defects
- Dematerialization of documents
- High adaptability of the products to specific needs
- Compliance with the regulations in force

### Constraints :

- Reorganization of work
- Training of field agents
- Permanent monitoring of production indicators

### Technical Architecture :

- 3 Third parties ; WEB Mode
- Application Server
- Thin clients, multilingual

**Traceability is therefore essential to develop the business and reassure customers**, but it is also a logical response to current concerns regarding environmental and societal issues.

**OSIRIS  
GABON**

So many reasons that are gradually making it essential and indispensable in the supply chain.
